

Introducing the **100% Compostable, Bio-Degradable & Recyclable**

ButterflyCup Bio

ButterflyCup Bio has multiple benefits for YOU and YOUR customers.

- ✓ Eliminates **PLASTIC** lids
- ✓ Prevents **SPLASHES, LEAKS AND DRIPS**
- ✓ Reduces **STORAGE SPACE**
- ✓ **SPEEDS** the serving process
- ✓ Is **100% COMPOSTABLE, BIO-DEGRADABLE AND RECYCLABLE**

ButterflyCup Bio Life Cycle

- Renewable - Ambient Compostable - FCN Approved

THE ENVIRONMENTAL BENEFITS OF **BioPBS™**

Traditionally, paper cups are coated with plastic (PE) in order to make the paper water-proof. ButterflyCup Bio uses BioPBS as the environmentally friendly alternative to plastic.

Paper cups coated in BioPBS are compostable at ambient temperature and biodegrade naturally in the soil into biomass, carbon dioxide and water, leaving zero negative impact on the environment. Paper cups coated with BioPBS can also be 100% recycled or composted in commercial waste disposal facilities.

A further advantage of BioPBS is that it is produced from renewable materials (corn, cassava and sugar cane) thereby completing an environmentally friendly life cycle.

The following is a selection of certifications for **BioPBS™**

100% Compostable & Bio-Degradable

EUROPE

COMPOSTABLE
IN INDUSTRIAL FACILITIES
Check locally as these do not exist in many communities. Not suitable for backyard composting. CETT # 10528580
